

## **Description**

Divi Ghoster is a plugin that allows you to white label Divi so it is not recognizable on the back-end of the website, in most instances of the source code, or by most theme detector software. By configuring Divi Ghoster, you can add your own branding to the Divi tab in the dashboard, the page builder & page settings, and Theme Options. By enabling the "Ultimate Ghoster" option, you can also change the theme name under Appearance > Themes, hide the Divi Role Editor, hide Ghoster and other Divi related plugins from appearing, and hide traces of Divi from appearing in the source code and theme detector software. Divi Ghoster also provides a login page customizer, so you can brand the wp-admin page with your own background, logo, colors and more.

## **Installation / uninstallation**

### **Uploading in WordPress Dashboard**

1. **Backup your website as you should before installing any plugin**
2. **The Divi Theme (or Divi child theme) must be active**
3. **Change your permalinks to something other than "Plain"**
  1. Download and extract divi-ghoster-kit.zip
  4. Navigate to the 'Add New' in the plugins dashboard
  5. Navigate to the 'Upload' area
  6. Select divi-ghoster.zip from your computer
  7. Click 'Install Now'
  8. Activate the plugin in the Plugin dashboard
  9. Clear any caching plugins after activating / deactivating
10. **Please be sure to turn off "Ultimate Ghoster" prior to deactivating and deleting the Divi Ghoster plugin or switching themes.**

### **Using FTP**

1. **Backup your website as you should before installing any plugin**
2. **The Divi Theme (or Divi child theme) must be active**
3. **Change your permalinks to something other than "Plain"**
4. Download and extract divi-ghoster-kit.zip
5. Upload the divi-ghoster.zip directory to the /wp-content/plugins/ directory
6. Activate the plugin in the WordPress Plugin dashboard
7. Clear any caching plugins after activating / deactivating
8. **Please be sure to turn off "Ultimate Ghoster" prior to deactivating and deleting the Divi Ghoster plugin or switching themes**

## **Divi Ghoster Setup - Please Read Carefully**

After successfully installing the plugin, a new tab titled 'Divi Ghoster' will appear in your dashboard. After clicking on the tab item, you will be brought to the Divi Ghoster dashboard and can begin custom branding your Divi installation.

1. **Navigate to Settings >> Permalinks and make sure your permalinks are set to something other than default**
2. **Enter your Branding Name** (example: "Acme Web Design"): This will replace all instances in the dashboard, page builder, etc. where the name 'Divi' appears. Hit 'Save Changes'
3. **Upload your desired Branding Image** (36px x 36px): This will replace all instances where the Divi icon appears in the dashboard, page builder, etc. If you upload a larger image of the same scale, it will reduce, but we encourage not using large file sizes.
4. **Enter your Slug Text** (example: acme\_web\_designs): This will change the default url slug that appears in Theme Options. Example: [http://yourwebsiteurl.com/wp-admin/ad-min.php?page=et\\_acme-web-designs](http://yourwebsiteurl.com/wp-admin/ad-min.php?page=et_acme-web-designs) . Hit 'Save Changes' towards the bottom of the page.
5. **Enable 'Ultimate Ghoster' - Very important to follow these steps:** Now that you have set up your desired branding, it is time to take the white labeling to the next level! In the Divi Ghoster dashboard, you will see an on/off toggle labeled 'Ultimate Ghoster'. Prior to ticking on 'Ultimate Ghoster', **be sure to save the provided URLs** to access the plugin and Role Editor in the future. If you lose track of where you placed them, **refer back to the FAQ section of this documentation** for recovery instructions (it's pretty easy, so don't stress, yo).

**Once "Ultimate Ghoster" is enabled and saved, the following functions will take place:**

- The 'Divi Ghoster' link in the dashboard will disappear
- Divi Ghoster and other popular Divi-related plugins will not be visible in the plugins dashboard
- The Divi theme will be hidden from the source code and theme detector websites and replaced with your selected branding name
- The theme name under Appearance > Themes will be branded with your name.
- The "Role Editor" will be hidden

**IMPORTANT: Please be sure to turn off "Ultimate Ghoster" prior to deactivating / deleting the Divi Ghoster plugin or switching themes.**

**Congratulations, your Divi website is now white labeled!**

Ultimate Ghoster

Ultimate Ghoster

ON

Ultimate Ghoster will not work if the permalink structure is set to Plain in Settings > Permalinks.  
Enabling Ultimate Ghoster will hide the Divi Ghoster plugin. Please copy this URL and save it to disable this feature later: [http://divibeta.aspengrovestudios.space/wp-admin/admin.php?page=divi\\_ghoster](http://divibeta.aspengrovestudios.space/wp-admin/admin.php?page=divi_ghoster)  
Enabling Ultimate Ghoster will hide the Divi Role Editor from the dashboard. It can be accessed directly at any time by visiting: [http://divibeta.aspengrovestudios.space/wp-admin/admin.php?page=et\\_divi\\_role\\_editor](http://divibeta.aspengrovestudios.space/wp-admin/admin.php?page=et_divi_role_editor)  
Enabling Ultimate Ghoster will hide "Divi Switch" and "Divi Booster" from the Divi menu and the Plugins list. If installed, they can be accessed directly at any time by visiting:  
For Divi Switch: <http://divibeta.aspengrovestudios.space/wp-admin/admin.php?page=divi-switch-settings>  
For Divi Booster: <http://divibeta.aspengrovestudios.space/wp-admin/admin.php?page=wtfdivi-settings>

## **FAQ**

### **I enabled 'Ultimate Ghoster' and can't access the plugin dashboard**

Simply follow this URL structure (replace with your domain) to access the dashboard [http://yourwebsiteurl.com/wp-admin/admin.php?page=divi\\_ghoster](http://yourwebsiteurl.com/wp-admin/admin.php?page=divi_ghoster)

### **I enabled 'Ultimate Ghoster' and can't access the Divi Role Editor**

Simply follow this URL structure (replace with your domain) to access the dashboard [http://yourwebsiteurl.com/wp-admin/admin.php?page=et\\_divi\\_role\\_editor](http://yourwebsiteurl.com/wp-admin/admin.php?page=et_divi_role_editor)

### **Are there any bugs with this plugin?**

We have tested this plugin and have found no known bugs or conflicts, but there is always the chance of unforeseen situations and potential bugs, which are more often than not reported by our users. If your website does happen to crash after installing this plugin, please follow WordPress' procedure on manually deleting a plugin here [https://codex.wordpress.org/Managing\\_Plugins](https://codex.wordpress.org/Managing_Plugins). For additional support visit <https://aspengrovestudios.com/support/>

### **How do I update this plugin to newer versions?**

When a version update is available, a notice will appear in your WordPress dashboard. Simply follow the steps to update like you would any other plugin in the repository.

### **Will this plugin slow down my site?**

This plugin is well developed and extremely lightweight,. As with any plugin, this one has the potential to slow down your site, but we estimate the impact to be almost immeasurable.

**What happens if I deactivate or uninstall this plugin?**

Should you ever have the need to uninstall or deactivate this plugin, all default 'Divi' branding will return. As mentioned previously, please be sure to disable "Ultimate Ghoster" prior to deactivating and uninstalling Divi Ghoster.

**How many websites can I install this plugin on?**

Your purchase is good for unlimited installs, so enjoy :)
